Title
Description:

Prototype Deltic Locomotive

Subject: English Electric DP1 "Deltic"
Kit Make: Dapol (originally Kitmaster) Scale: 1/100
This injection moulded kit is still in production & has been made from moulds from 1959.
Much of the moulded detail has been removed & replaced with wire. The vacuum brake pipe couplings are etched brass. The locomotive was built to EM gauge (18.2mm) - effectively 1/87 scale.
Locals, nameplates and works plates are by Fozzy. The locomotive is painted with Railmatch and Humbrol enamels.
